

TENDERCARE

Mature & Formal Hardy Plants

Climbers & Wall Shrubs

Wall, fences and pergolas, arches and tunnels all provide the perfect setting for climbers and wall shrubs. Easy to care for when pruned at the right time of year, they provide a profusion of flower, fruit and fragrance. In small gardens, they can be used to unify a space or to provide a variety of flower periods.

Our climbers are grown on a tripod of canes for height and instant effect. Our wall shrubs are clipped to form neat two dimensional plants on a trellis, easy to maintain thereafter. Our screening plants are grown on a strong frame of bamboo canes. Our climber fixing kits include all you need to create a strong but invisible support for these plants, whatever the structure you wish to grow them over or against.

All prices include V.A.T.
